

## **Midas Perpetual Portfolio Achieves Five Star Ratings by Morningstar**

NEW YORK, NY – Midas Funds is pleased to announce today that Midas Perpetual Portfolio (MPERX) has been awarded Morningstar's highest 5 star overall rating, as well as 5 stars for the 3 year, 5 year, and 10 year periods ending June 30, 2010. Morningstar has included Midas Perpetual Portfolio in its "Large Growth" fund category which consists of 1,828 funds as of June 30, 2010. Morningstar is a leading provider of independent investment research. Midas Perpetual Portfolio is also in the process of being added to Charles Schwab's Mutual Fund Marketplace®.

Midas Perpetual Portfolio seeks to preserve and increase the purchasing power value of its shares over the long term by investing a fixed target percentage of its total assets in gold, silver, Swiss franc assets, hard asset securities, large capitalization growth stocks, and dollar assets.

"We are excited to see Midas Perpetual Portfolio win five stars. The investment strategy of the Fund acknowledges a broad range of economic possibilities and investing outlooks, and seeks to incorporate investments appropriate for each of them. Investors who wish to invest all or a portion of their capital in a way that does not depend on any particular outcome for the economy should consider purchasing shares of the Fund," said Tom Winmill, chairman of the Midas Investment Policy Committee that manages the Fund.

Past performance is no guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.

*Midas Perpetual Portfolio is subject to the risks associated with market fluctuations, foreign investment, non-diversification, concentration, investments in gold, silver, platinum, and other precious metals, natural resource companies, depletion and exploration risk, in-kind redemptions, Swiss franc assets, real estate companies, and fixed income securities. Prior to December 29, 2008, the Fund (formerly known as Midas Dollar Reserves, Inc.) operated as a money market fund and invested exclusively in securities issued by the U.S. Government, its agencies and instrumentalities. On December 29, 2008, the Fund changed its name from Midas Dollar Reserves, Inc. to Midas Perpetual Portfolio, Inc. and began operating as a fluctuating net asset value fund with the investment objective, strategies, and risks noted above. You should carefully consider the investment objectives, risks, charges and expenses of the Midas Funds by reading the prospectus carefully before investing or sending money. #### About Morningstar Ratings

The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-year, five-year, and ten-year (if applicable) Morningstar Ratings. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating<sup>™</sup> based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. These ratings change monthly. The top 10% of funds in an investment receive five stars, the next 22.5% receive four stars, the next 35% receive three stars, the next 22.5% receive two stars and the bottom 10% receive one star. Morningstar does not guarantee the accuracy of this information.

The Morningstar Risk Rating is an annualized measure of a fund's downside volatility over a three-, five-, or ten-year period. This is a component of the Morningstar Risk-Adjusted Return. Morningstar Risk Rating is derived directly from Morningstar Risk. In each Morningstar Category, the top 10% of investments earn a High rating, the next 22.5% Above Average, the middle 35% Average, the next 22.5% Below Average, and the bottom 10% Low. Investments with less than three years of performance history are not rated. The Morningstar's Return rating figures a fund's performance relative to its class based on total returns.
