*Past performance is no guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.*

*One of Midax's guiding principles is that we will communicate with our shareholders and prospective investors as candidly as possible because we believe shareholders and prospective investors benefit from understanding our investment philosophy and approach. Our views and opinions regarding the prospects of our portfolio holdings, Funds, and the economy are "forward looking statements" which may or may not be accurate and may be materially different over future periods. We disclaim any obligation to update or alter any forward looking statements, whether as a result of new information, future events, or otherwise. Thus, you should not place undue reliance on forward looking statements, which also speak only as of the date of the Midax communication.*

*You should carefully consider the investment objectives, risks, charges and expenses of the Midax Funds by reading the prospectus carefully before investing or sending money. For investment risks associated with each Fund, please read "Principal Risks of Investing in the Fund," and "Additional Investment Risks" in the free prospectus, which contains this and other important information about the Midax Funds.
